

5 TIPS TO PREVENT FIP

The leading infectious cause of cat death

Check cats for antibodies to Feline Coronavirus FCoV

1

Check a young cats and kittens (pedigree) first!

2

Use serological test (FCoV IgG) to rule out the FIP

3

Screen cat breeding households to reduce the risk of FIP

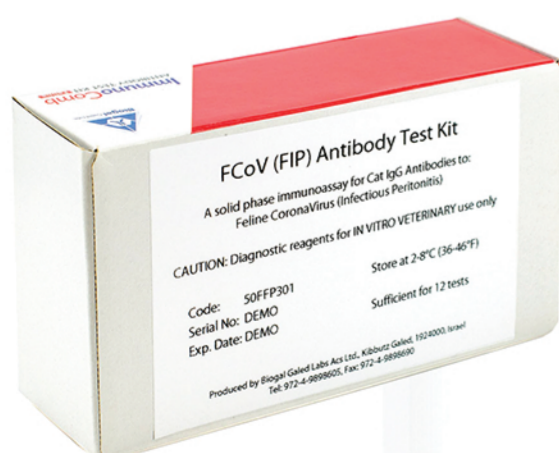

4

Screen a cat prior to stressful procedures or treatment

5

ImmunoComb

The ImmunoComb Feline Coronavirus (FCoV) Antibody Test Kit is designed for measuring serum IgG antibody levels to FCoV in cats, to monitor FCoV infections and assist in the diagnosis of Feline Infectious Peritonitis (FIP)
